DETAILED ACTION

Claims 1-14 are pending.

The Instantly claimed invention lacks Unity of invention in light of the prior art disclosing a natural MurD mutant of SEQ ID NO 2, produced by E.coli, and has the biological enzymatic activity of MurD, specifically a UDP-MurNAc-L-Ala-D-Glu synthetase. The following lack of unity is being set forth in light of the fact that the first appearing invention directed to natural mutants of a polynucleotide that encodes a MurD polypeptide was known in the prior art, and therefore does not define a unifying special technical feature that defines over the prior (International Search Report, October 21, 1999).

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to a purified and isolated polynucleotide that encodes SEQ ID NO 2, is a complementary polynucleotide of SEQ ID NO 2, a natural mutant polynucleotides of SEQ ID NO 2 or a polynucleotides that comprises at least 25 nucleotides of any of the other embodiments of polynucleotide that encodes SEQ ID NO 2 or a mutant of SEQ ID NO 2.

Art Unit: 1645

Group II, claim(s) 8, drawn to a purified polypeptide that is SEQ ID NO 2 or a mutant or polymeric form of SEQ ID NO 2.

Group III, claim(s) 9-11, drawn to a method of screening for inhibitors of MurD.

Group IV, claim(s) 12, drawn to compounds that are inhibitors of MurD.

Group V, claim(s) 14, drawn to a method of treating disease associated with a pathogen that produces MurD.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The polynucleotide, polypeptide, and inhibitors, and methods of using the polynucleotide or polypeptide, differ in structure, function and biological effect, and therefore define independent and distinct special technical features.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
